EDUCATION

MIT World Peace University

Aug 2024 – Present

Masters of Computer Application - CGPA 8.52

Pune, Maharashtra

C. B. Patel Computer College (Under VNSGU)

Aug 2021 – Apr 2024

Bachelor of Computer Application - CGPA - 8.36

Surat, Gujarat

EXPERIENCE

Programmer Prodigies (Client Project)

Oct 2024 – Dec 2024

Flutter Developer

Pune, India

- Developed a Flutter-based mobile app that served as a centralized platform for students to share study materials, improving access to academic resources.
- Collaborated in a two-person team to build a systematic and scalable application using Flutter and Firebase Real-Time Database.
- Enhanced application integrity by implementing security features to prevent screenshots and screen recordings, successfully safeguarding the client's intellectual property.
- Architected the initial Firebase integration, utilizing Authentication, Storage, and Real-Time Database services.

PROJECTS

Business Sehyogi  | Flutter, Spring Boot, ReactJs, Azure

Aug 2024 - Dec 2024

- Developed a comprehensive platform for aspiring entrepreneurs to connect, reducing networking time by 20%.
- Facilitated idea collaboration, contributing to a potential 30% increase in venture success rates among users.
- Architected and developed a scalable system featuring a Flutter app, ReactJs frontend, and Spring Boot APIs in a 4-person team.
- Managed the deployment of backend services on Azure, ensuring 24/7 high availability and seamless performance.

Arogya Sair  | Flutter, Core PHP, Firebase

Dec 2023 - Mar 2024

- Led the development of a mobile application to streamline medical appointment booking, making the process 30% faster for patients.
- Engineered a collaborative platform for patients, hospitals, and doctors using Flutter and Firebase for real-time data sync.
- Implemented core features including doctor search, appointment scheduling, and real-time status updates.
- [App Demo](#)

Brunch  | Android (Kotlin), SQLite

Jun 2023 - Sep 2023

- Designed and developed an Android application to modernize restaurant order and menu management systems.
- Created a dual-user system (admin, staff) to improve order-taking efficiency and reduce operational errors.
- Utilized SQLite for local data persistence, ensuring offline functionality and quick data retrieval.

TECHNICAL SKILLS

Languages: Java, Python, C++, Dart, SQL, HTML/CSS, Core PHP

Developer Tools: VS Code, Android Studio, IntelliJ Idea, Git, GitHub

Technologies/Frameworks: Flutter, Spring Boot, ReactJs, Linux, Azure

Databases: Firebase, MySQL, SQLite, PostgreSQL, MongoDB

CERTIFICATIONS

- Java Data Structures & Algorithms +LeetCode exercises - Certificate
- Java for Programmers crash course - Certificate
- Git For Beginners - Certificate
- SQL Basic by Hacker Rank - Certificate
- Postman API Fundamentals studentexpert – Badge
- Business Intelligence using Power BI - Certificate
